

G0400 – ADVANCED ICS FOR COMPLEX INCIDENTS COURSE

**KHP Training
Academy,
Salina**

**September 29–30,
2026**

Register on KS-TRAIN

This course is intended for an audience of experienced responders and other senior emergency management personnel who may perform in a management capacity for major or complex incidents (Type 1 or Type 2 incidents). Large and complex incidents that require the application of area command don't happen often. Although this is an advanced ICS course, it is not intended to develop mastery of area command. The purpose of this course is to expose students to the concepts of utilizing area command in major and complex incidents.

The target audience for this course includes experienced senior emergency management personnel who may perform in a management capacity for major or complex incidents. This group includes individuals who may serve as the Incident Commander, as a member of a Unified Command, or as members of the Command or General Staff, or Multiagency Coordination Group/Emergency Operations Center (EOC) management for incidents that may use an Area Command.

This course is limited to individuals who serve in Command or General Staff functions during Complex Incidents. Applications are subject to approval by their local Emergency Manager or Senior Official.

PREREQUISITES

- IS-100 – Introduction to ICS
- IS-200 – Basic ICS for Initial Response
- IS-700 – An Introduction to NIMS
- IS-800 – NRF, An Introduction
